O s t i n a t o "Slowwalker"

This is the second album of the Funk/Fusion/Latin Jazz band. At this time the status of the group was quite settled, after the time of big festivals like Velden and Wiesen in Austria. The band is touring at least two times a year, mostly in the german speaking part of Europe: Austria, Switzerland, Germany. The main actors are still Tommy Böröcz and Rens Newland as the composers and arrangers, the rest of the band is changing, especially because of the overlap situation with the Vienna Art Orchestra, which is very succesful at that time and doing big long tours. But Vienna is a good source for Jazz musicians. so new talents get their chance here, like the genius trumpet player Andy Haderer, who is later changing to the famous WDR Big Band on lead trumpet! The musical ideas and interpretations are fresh, partly a little more rocky or heavy grooving. The typical Ostinato heavy Funk shuffle is heard three times on these recordings.
