"listen to your ears"

The 9th album of Rens Newland under his own name, in the Jubilee year 2018 (40 years in Austria as Gitarrero – starting with the ORF Big Band, over Ostinato, a lot of theatre and studio productions, up to working with the Supremes and Gloria Gaynor – also as musical director and arranger – plus a round birthday!) should get something special, of course! And it became true: Here he presents the broad spectrum as composer and guitarist: compact Groove pieces to extremely cunning Fusion ballads, but also uptime Swing and warm hearted Jazz ballads are part of the title list. Besides that he takes a different guitar for almost every song, which makes the experience even more exciting and diversified: The Jazz Gibson L5, Fender Telecaster, Godin, Gretsch have their appearance, and even the Line 6 Variax (modelling) guitar glances on some tracks! For these recordings the Bandleader choose to double the guitar melodies unison with the tenor sax of master Herb Berger. Mr. Newland found out on many concerts and recordings that the musical comprehension and timing between himself and Herb are perfect. The further musicians on the album, Wolfi Rainer on drums, Andy Mayerl on upright bass and Martin Wöss on Rhodes and Grand Piano operate very tasty and smart, they leave enough space for melodies and improvisations. With this album Rens Newland again confirms his place on the european guitar summit.
